# What Issues and Obstacles are (Potentially) Impeding Progress

# Eric Boerwinkle NHGRI, DC June, 2012

The University of Texas Health Science Center at Houston

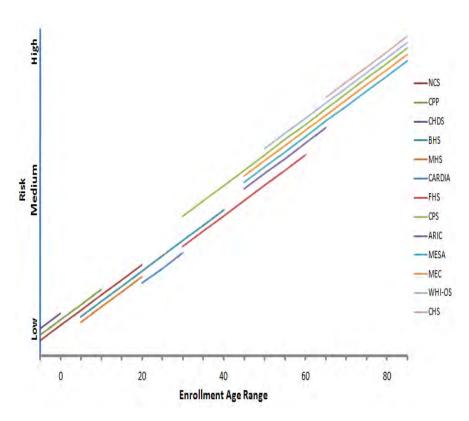

# **Punch Line**

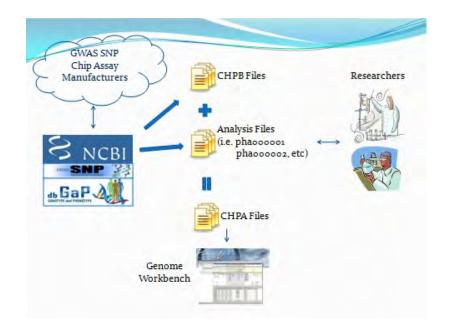

- Few technical or material issues
  Hurtles, not walls
- Conceptual issues
  - e.g. Clear articulation of the goal
- Organizational issues
  - Going to be the most difficult

# Technical and Material Issues #1

Available samples on wellphenotyped individuals.

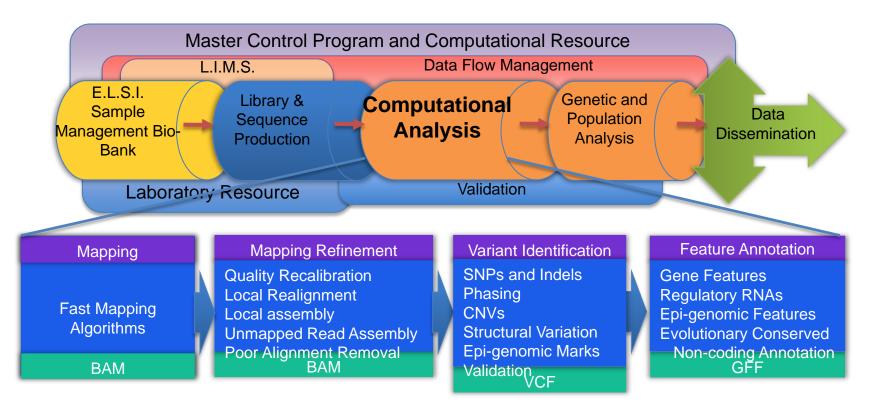

### Data Sharing

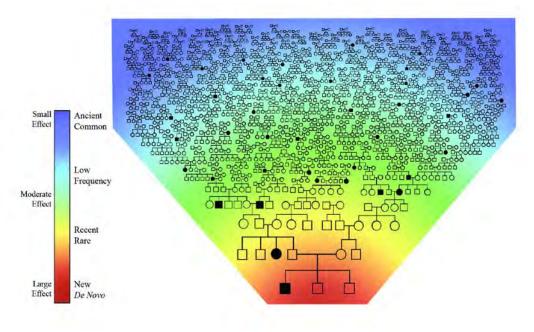

# Technical and Material Issues #2

### Data Processing and Handling BCM HGSC *Mercury*

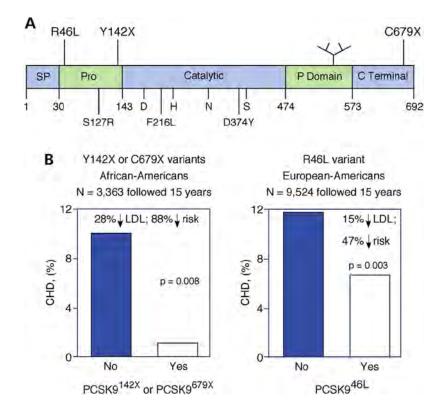

# **Conceptual Issues**

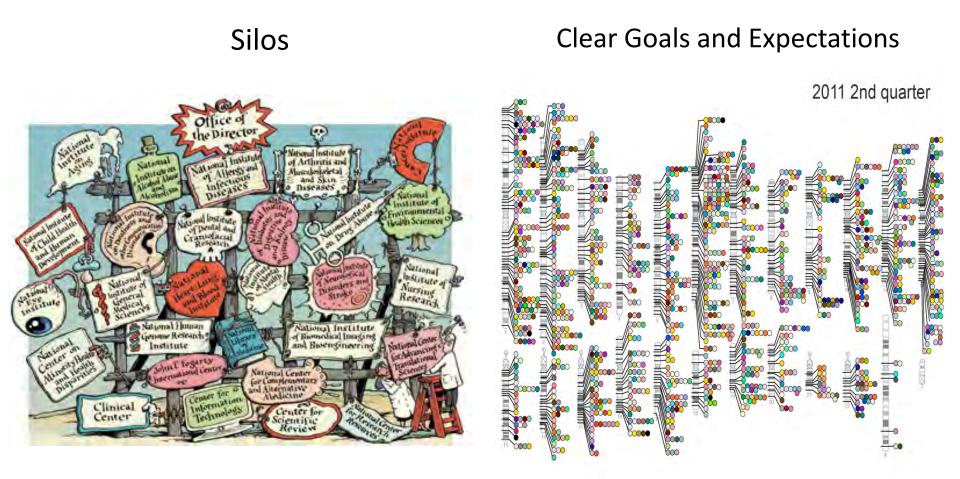

# Lack of a conceptual framework for rare variants and public health

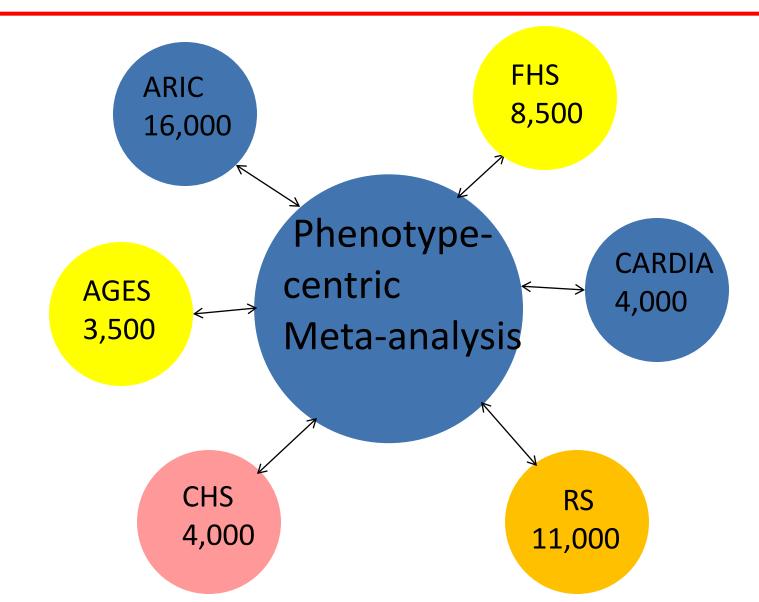

#### Need to recognize success

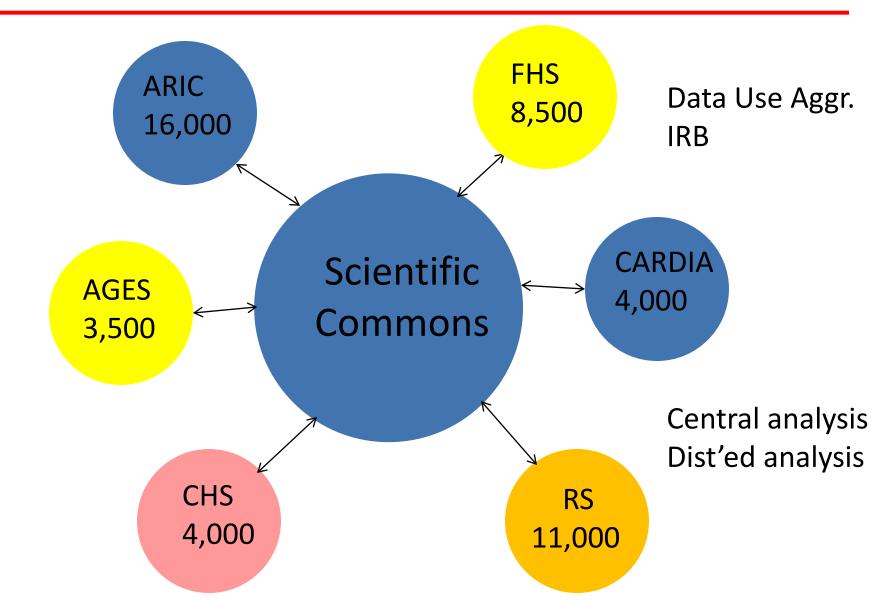

# **Organizational Issues**

## CHARGE Consortium (Old, GWAS)

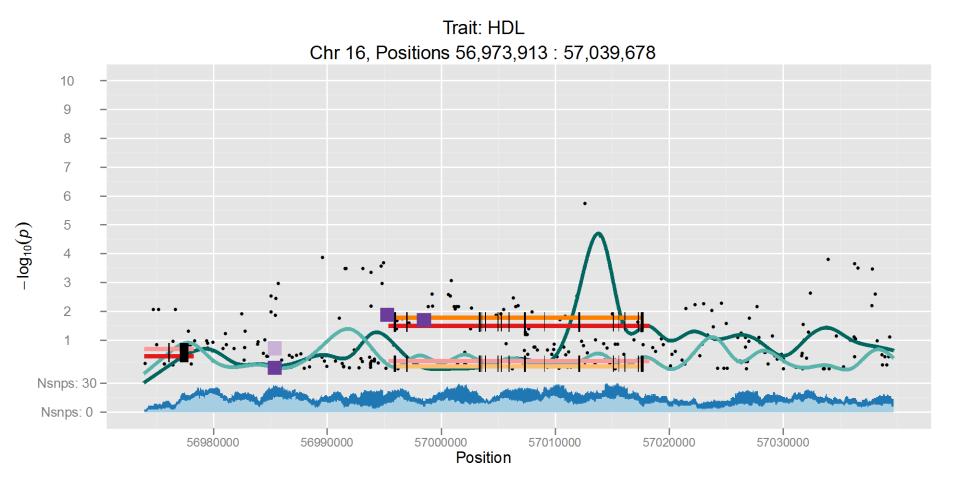

## CHARGE Consortium (New, WGS)

### **Organizational and Conceptual Issues**

#### Bring Down the Silos and Having Clear Goals

# But, I am an optimist.....
