Gated Repository

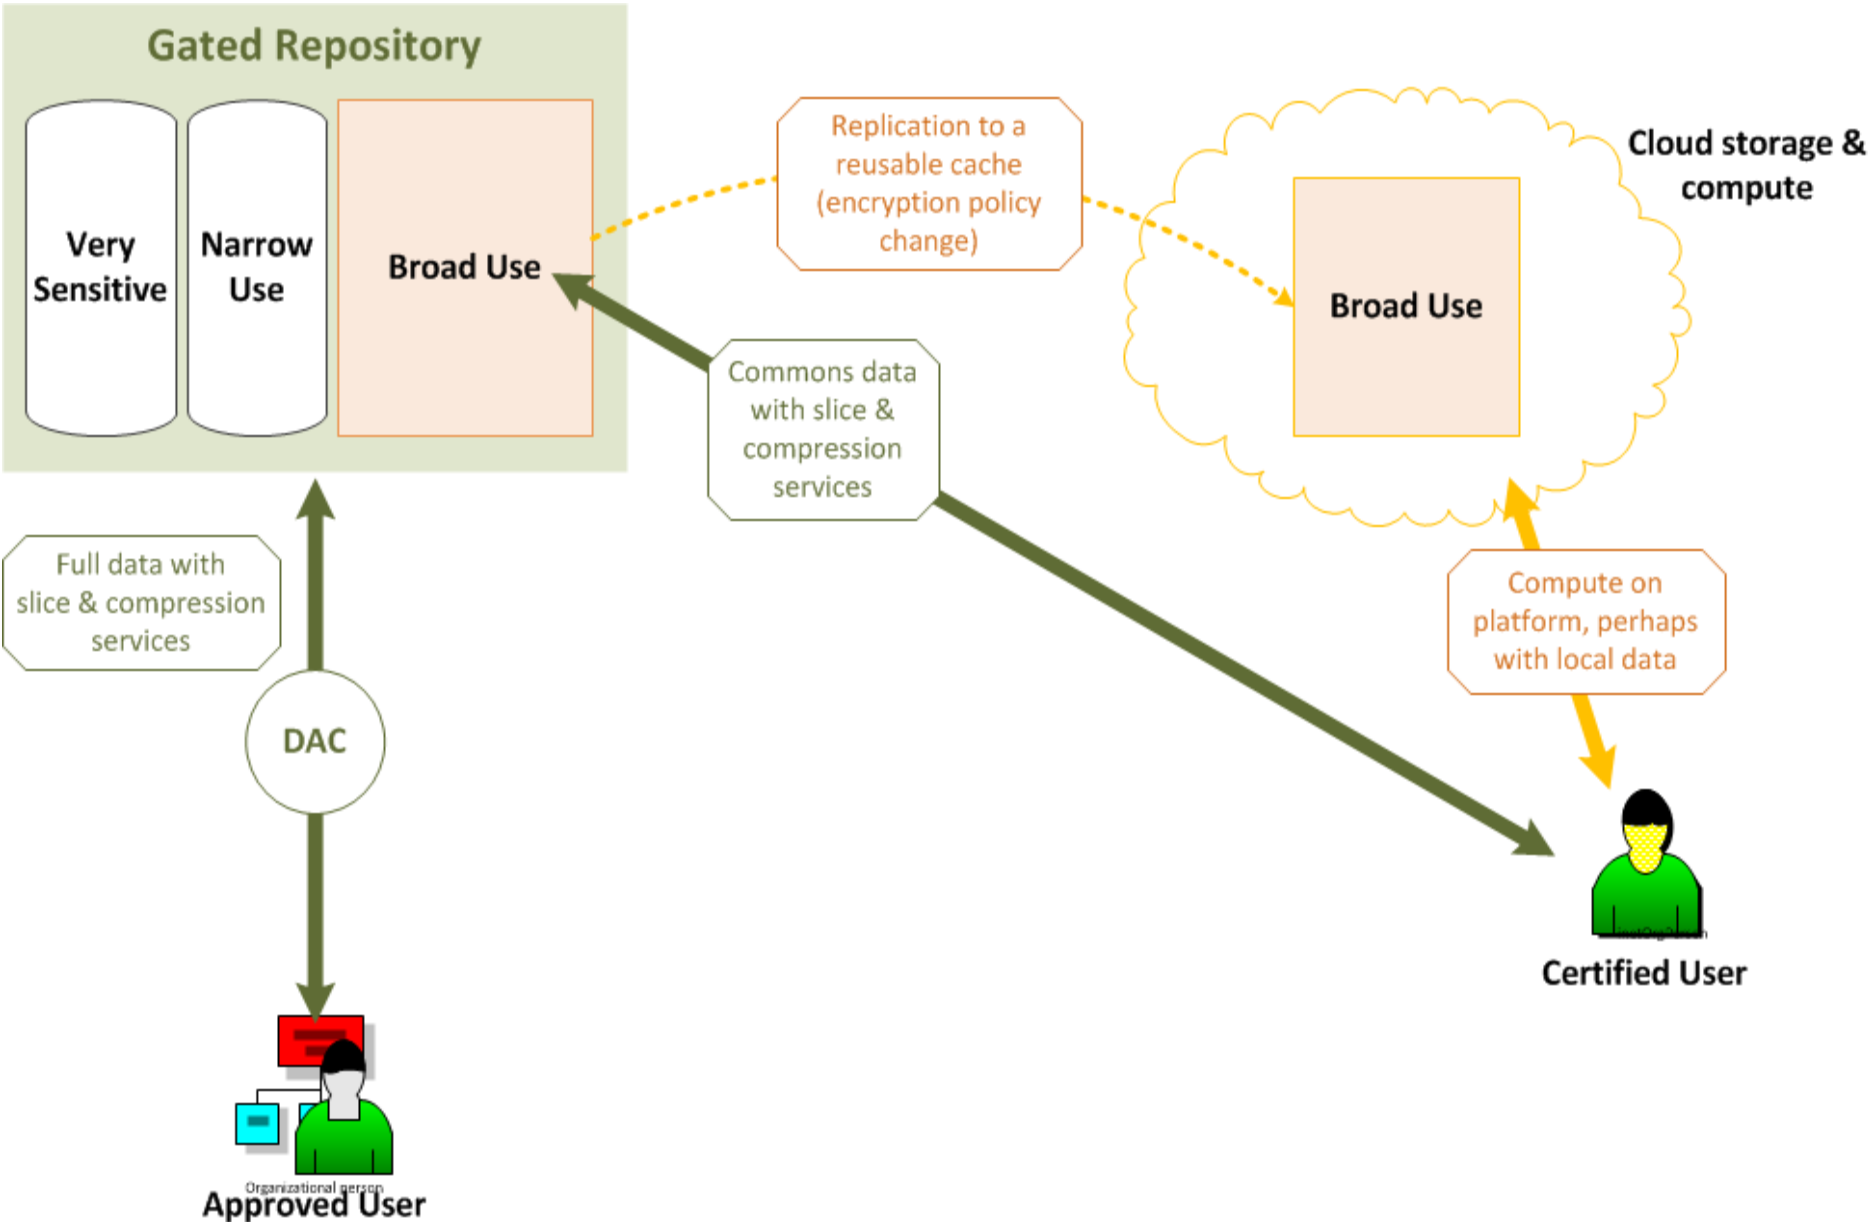

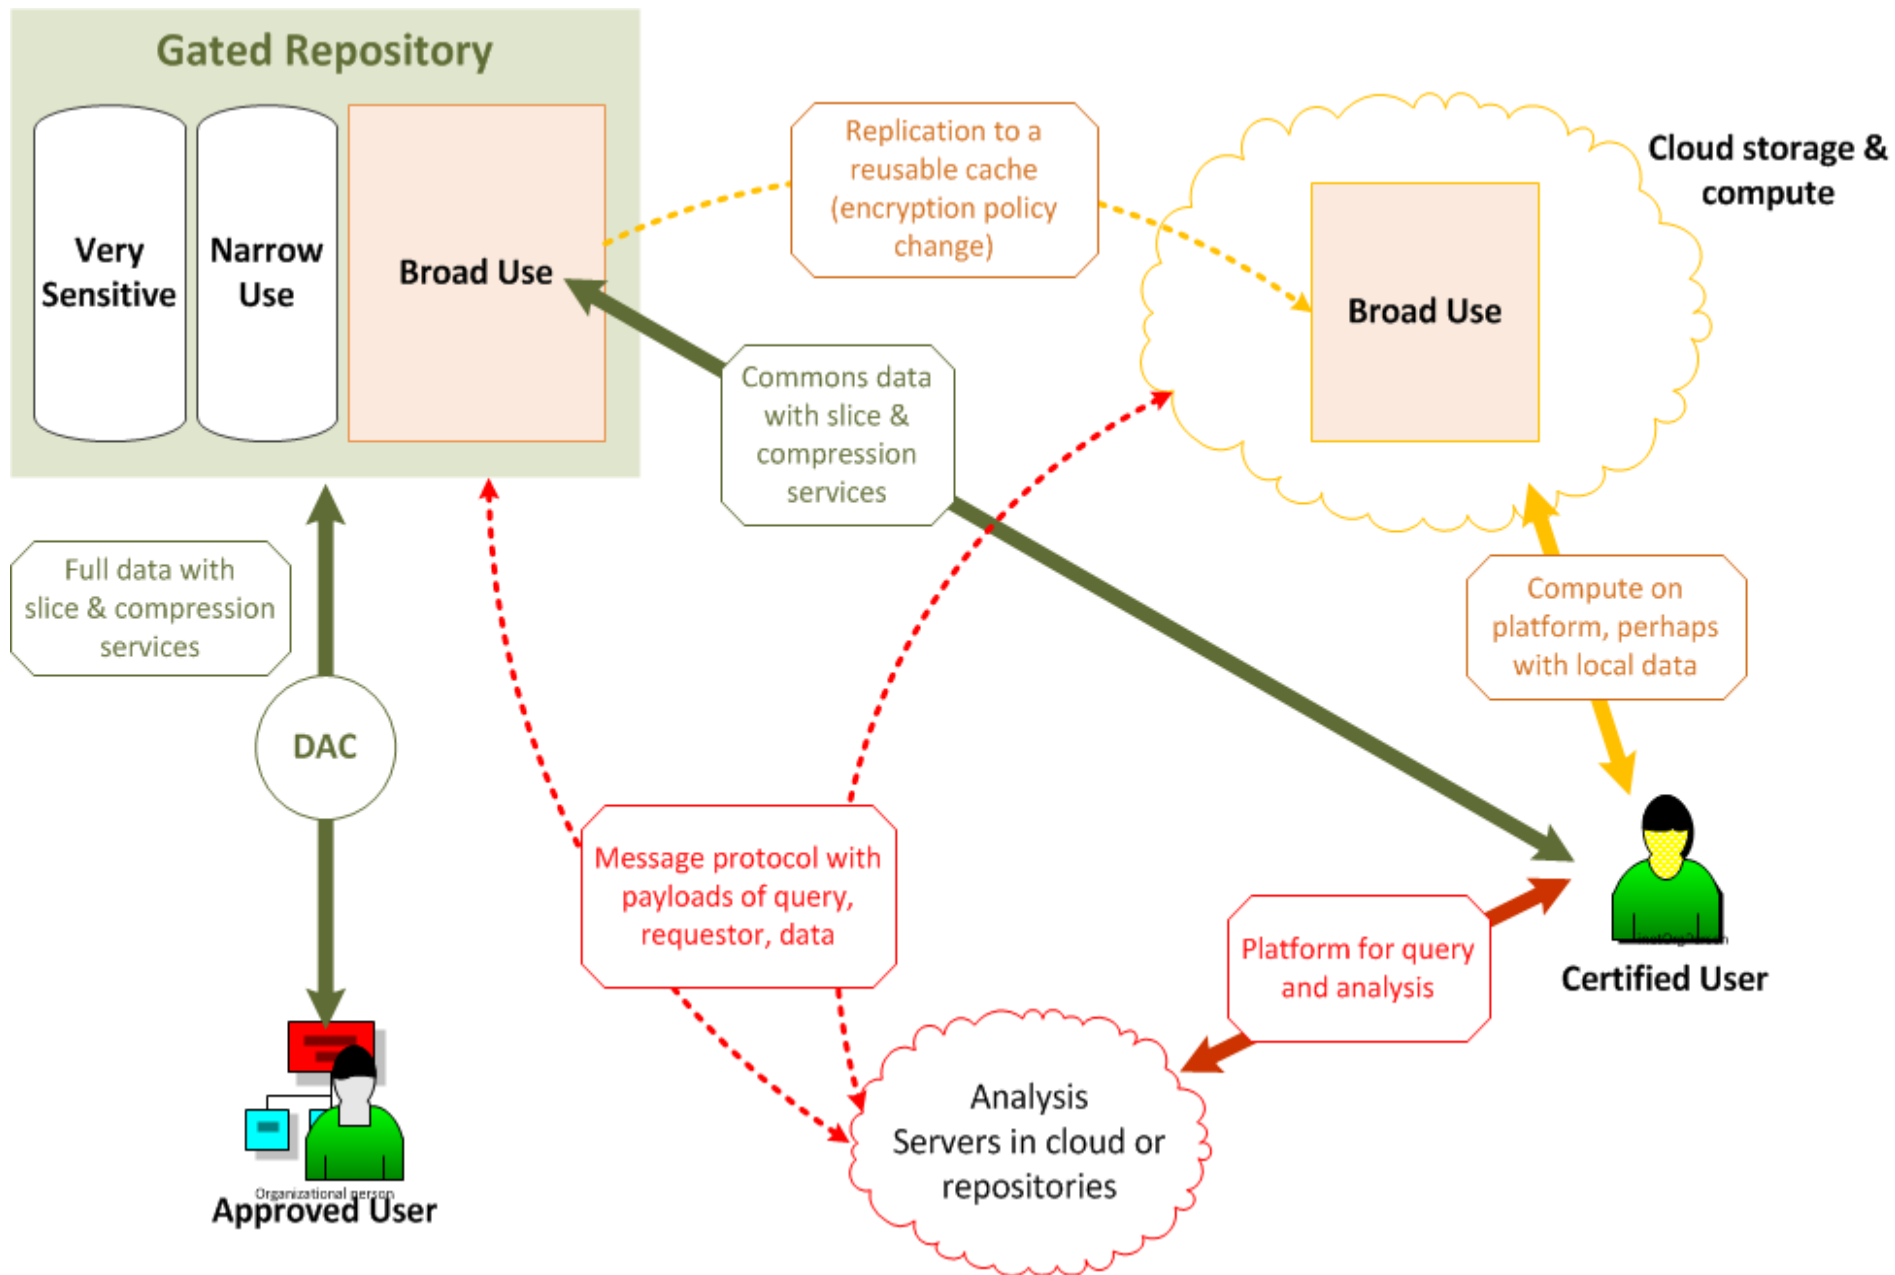

Adding combined aggregate data analysis sets for expedited access

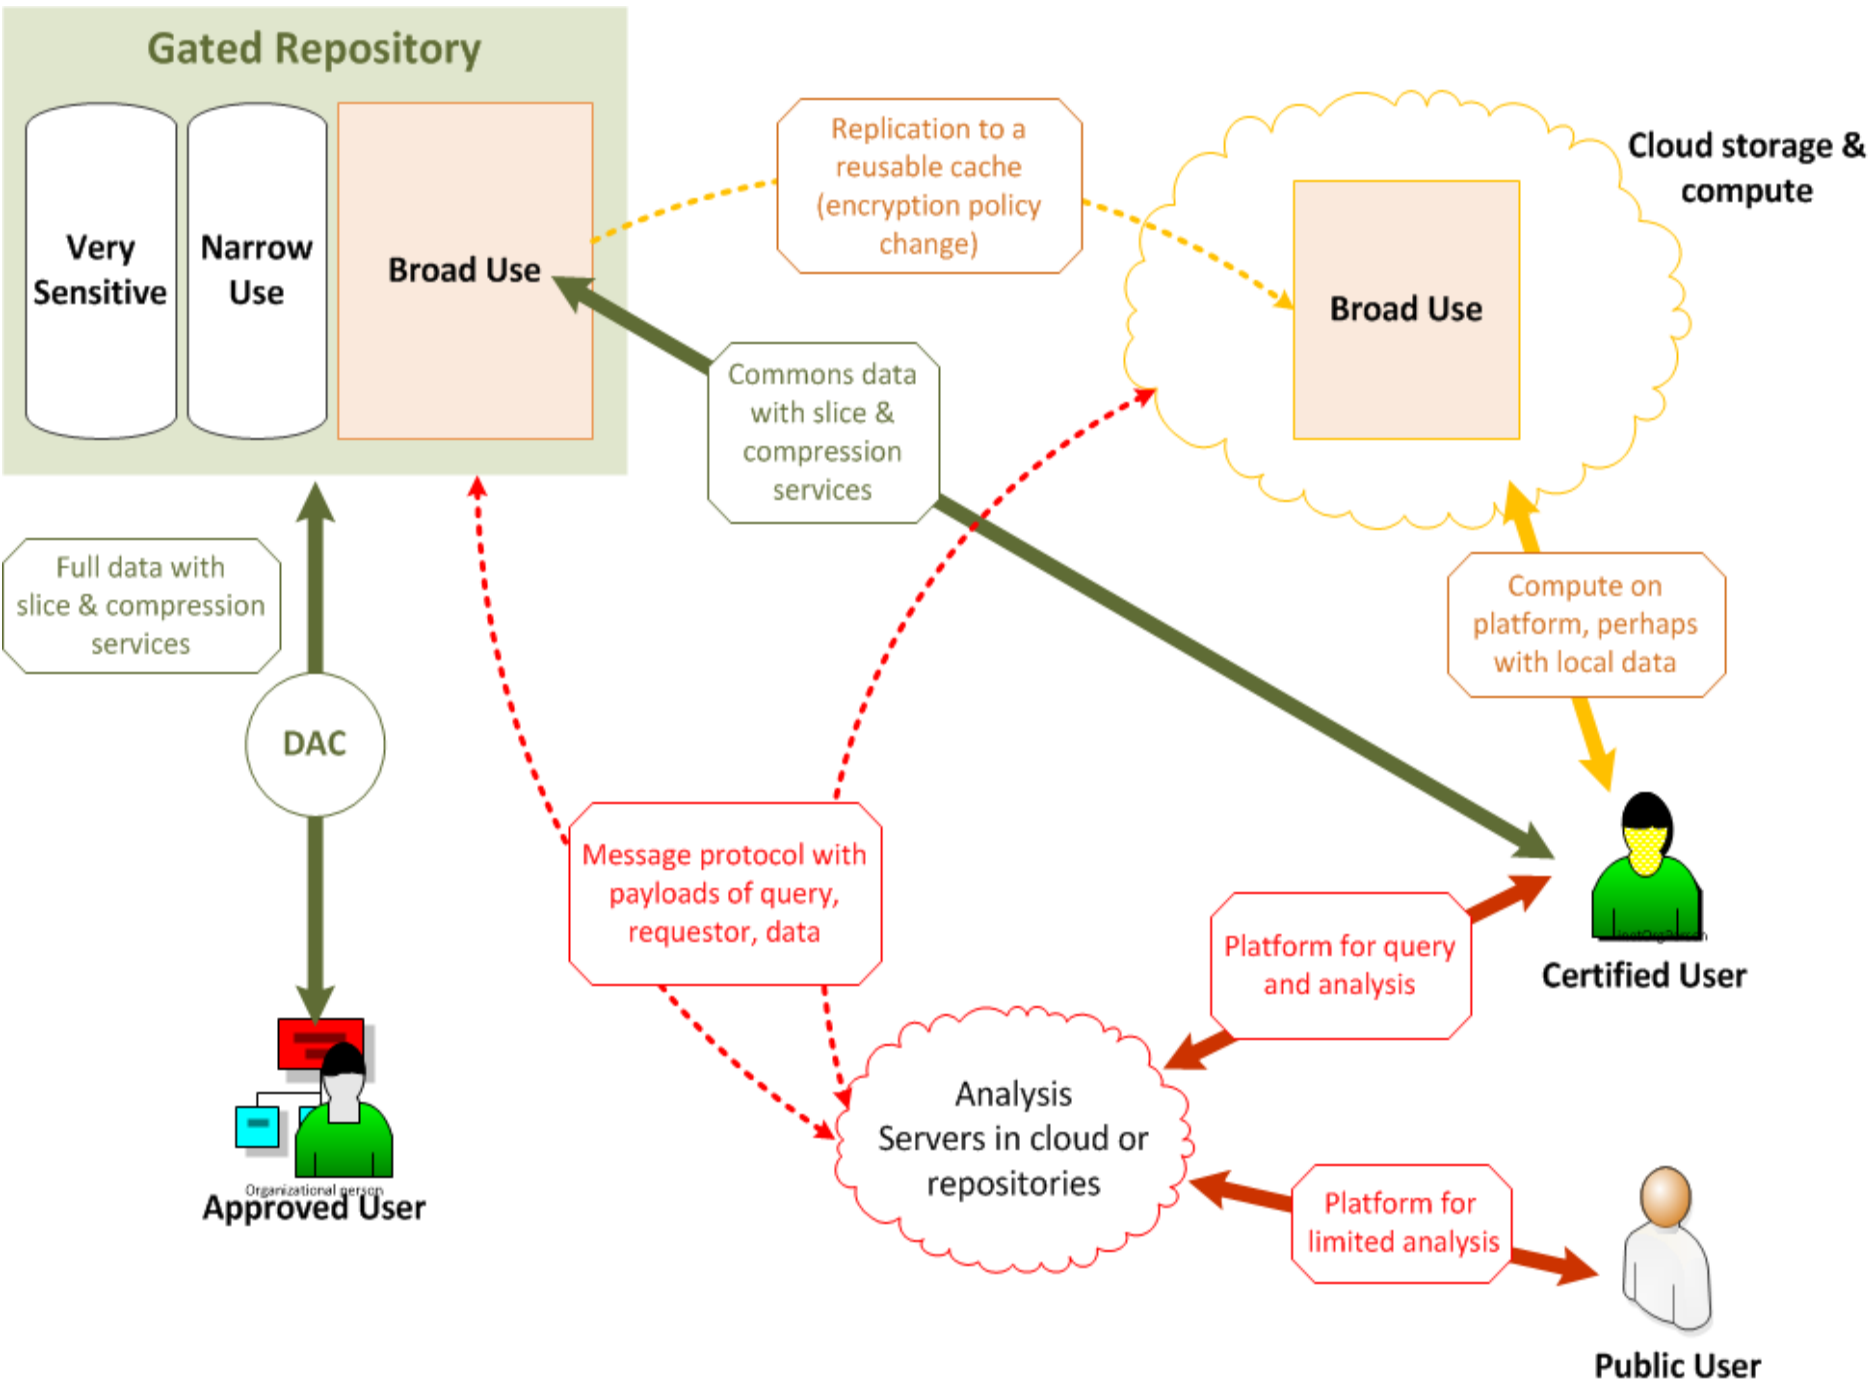

This can be done in July and ready for the fall if recomputes for Broad Use GRU sets are prepared!

Elements of a general platform

- Standards for security that permit many individuals to access a source copy.
- Data presentation standards: BAM, VCF, haplotypes, phenotypes, environment
- Message structures for global queries and results.
Payload of user properties, question, data permissions
- International coordination for policy & requirements
(needs a body)
- Special attention (recalculation) to Research Commons
Broad Use studies (or parts of studies)?
