

**Multi-IC Symposium on Application of Genomic Technologies to
Population-Based Studies**

June 5-6, 2006
Bethesda Marriott

ISSUES FOR CONSIDERATION

Panel 1: Challenges of keeping pace with evolving genotyping and sequencing technology

- a. Current standards for genotyping technology: data completeness and reproducibility, genomic coverage, comparability across platforms, turnaround time, cost
- b. Current standards for sequencing technology: data completeness and reproducibility, comparability across platforms, turnaround time, cost
- c. Adopting new technologies
