EMR Integration and Genomic Medicine Implementation - Summary

By: J. Michael Gaziano, MD, MPH

Director, MAVERIC, VA Boston Healthcare System
Chief, Division of Aging, Brigham and Women’s Hospital
Professor of Medicine, Harvard Medical School
EMR Integration and Genomic Medicine Implementation - Summary

Discussion/Challenges

• Institutional buy-in is generally good, but less for clinical implementation.

• System heterogeneity between institutions complicates implementation – if you’ve seen 1 implementation you’ve seen 1 implementation.

• Customized installations could impact aggregate experience – process outcomes are set.

• Appearance in the EHR
EMR Integration and Genomic Medicine Implementation - Summary

Discussion and Challenges

• Use cases defined by the eMERGE PGx
• Outcomes are process based
• Clinic outcomes to follow process outcomes?
• Next steps?
