## The application of computing technologies to biological information

- Development of new methods and algorithms
- Use of existing methods
- Development of LIMS
- Processing of biomedical data
- Development of analysis pipelines and environments
- Curation, collation, and representation of biomedical data

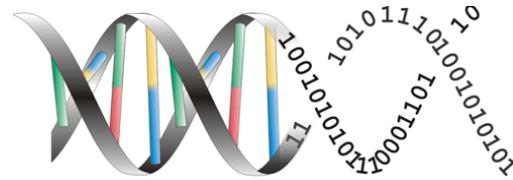

# NHGRI Bioinformatics Program (*version 0.1*)

- **Bioinformatics Grants Portfolio**
- **Other Bioinformatics Staff Activities**
  - **Bioinformatics Consulting Services**
  - **Trans NIH Bioinformatics Activities**

# NHGRI Bioinformatics Program (*version 0.1*)

- **Bioinformatics Grants Portfolio**
- Other Bioinformatics Staff Activities
  - Bioinformatics Consulting Services
  - Trans NIH Bioinformatics Activities

# Bioinformatics Program

- Managed by many NHGRI Program Directors

- Vivien Bonazzi
- Lisa Brooks
- Mike Pazin
- Erin Ramos
- Adam Felsenfeld
- Heidi Sofia
- Elise Feingold
- Lucia Hindorff
- Jeff Schloss
- Jeff Struewing
- Anastasia Wise
- Tina Gatlin
- Bettie Graham

# Types of Bioinformatics Grants

## ○ Primary Bioinformatics

- Model Organism Databases (MODs)
- Enabling Bioinformatics Technologies
- Variation Analysis and Association
- Grants related to other biological areas
  - Gene Regulation, NGS Data Analysis, Genome Annotation, Clinical Informatics, Gene Expression, Networks, Pathways and Systems, Biomedical Ontologies
- DACC (Data Analysis and Coordination Centers)

## ○ Component Bioinformatics

- Where the computational component is NOT the major focus of the grant

# Types of Bioinformatics Grants

## ○ Primary Bioinformatics

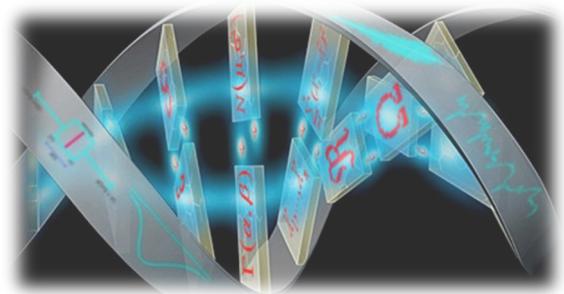

- Model Organism Databases (MODs)
- Enabling Bioinformatics Technologies
- Variation Analysis and Association
- Grants related to other biological areas
  - Gene Regulation, NGS Data Analysis, Genome Annotation, Clinical Informatics, Gene Expression, Networks, Pathways and Systems, Biomedical Ontologies
- DACC (Data Analysis and Coordination Centers)

## ○ Component Bioinformatics

- Where the computational component is NOT the major focus of the grant

# Types of Bioinformatics Grants

- **Model Organism Databases (MODs)**
- **Enabling Bioinformatics Technologies**
- **Large Scale Informatics Grants**
- **U41, P41, U01, P01**

# Enabling Bioinformatics Technologies

Enabling easier access, use, integration, visualization, or management of genomic data and tools

POs  
Vivien Bonazzi  
Lisa Brooks  
Adam Felsenfeld  
Lucia Hindorff  
Erin Ramos  
Heidi Sofia

# Types of Bioinformatics Grants

## ○ Primary Bioinformatics

- Model Organism Databases (MODs)
- Enabling Bioinformatics Technologies
- **Variation Analysis and Association**
- Grants related to other biological areas
  - Gene Regulation, NGS Data Analysis, Genome Annotation, Clinical Informatics, Gene Expression, Networks, Pathways and Systems, Biomedical Ontologies
- DACC (Data Analysis and Coordination Centers)

## ○ Component Bioinformatics

- Where the computational component is NOT the major focus of the grant

# Variation Analysis and Association

## Development of methods for analyzing genetic variation and association studies

- Discovery of genetic variation
- Association and linkage studies
- Population genetic analyses
- Admixture analyses
- Human genetic variation databases

POs  
Lisa Brooks  
Erin Ramos

# Types of Bioinformatics Grants

## ○ Primary Bioinformatics

- Model Organism Databases (MODs)
- Enabling Bioinformatics Technologies
- Variation Analysis and Association
- Grants related to other biological areas
  - Gene Regulation, NGS Data Analysis, Genome Annotation, Clinical Informatics, Gene Expression, Networks, Pathways and Systems, Biomedical Ontologies
- DACC (Data Analysis and Coordination Centers)

## ○ Component Bioinformatics

- Where the computational component is NOT the major focus of the grant

# Grants: other biological areas

- Gene Regulation
- NGS Data Analysis
- Genome Annotation
- Gene Expression
- Networks, Pathways and Systems
- Biomedical Ontologies
- Bioinformatics Training
- Mostly Smaller Scale grants:
  - R01, R21, R25, R42,43/44, K25, K99
  - Some U01

POs  
Vivien Bonazzi  
Lisa Brooks  
Elise Feingold  
Adam Felsenfeld  
Tina Gatlin  
Mike Pazin  
Jeff Schloss  
Heidi Sofia  
Jeff Struewing

# Types of Bioinformatics Grants

## ○ Primary Bioinformatics

- Model Organism Databases (MODs)
- Enabling Bioinformatics Technologies
- Variation Analysis and Association
- Grants related to other biological areas
  - Gene Regulation, NGS Data Analysis, Genome Annotation, Clinical Informatics, Gene Expression, Networks, Pathways and Systems, Biomedical Ontologies
- **DACC (Data Analysis and Coordination Centers)**

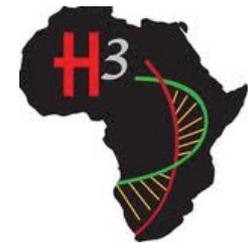

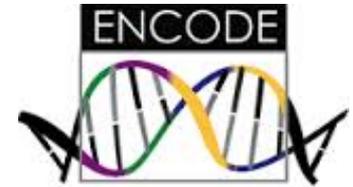

## ○ Component Bioinformatics

- Where the computational component is NOT the major focus of the grant

# DACCs

## Data Analysis and Coordination Centers

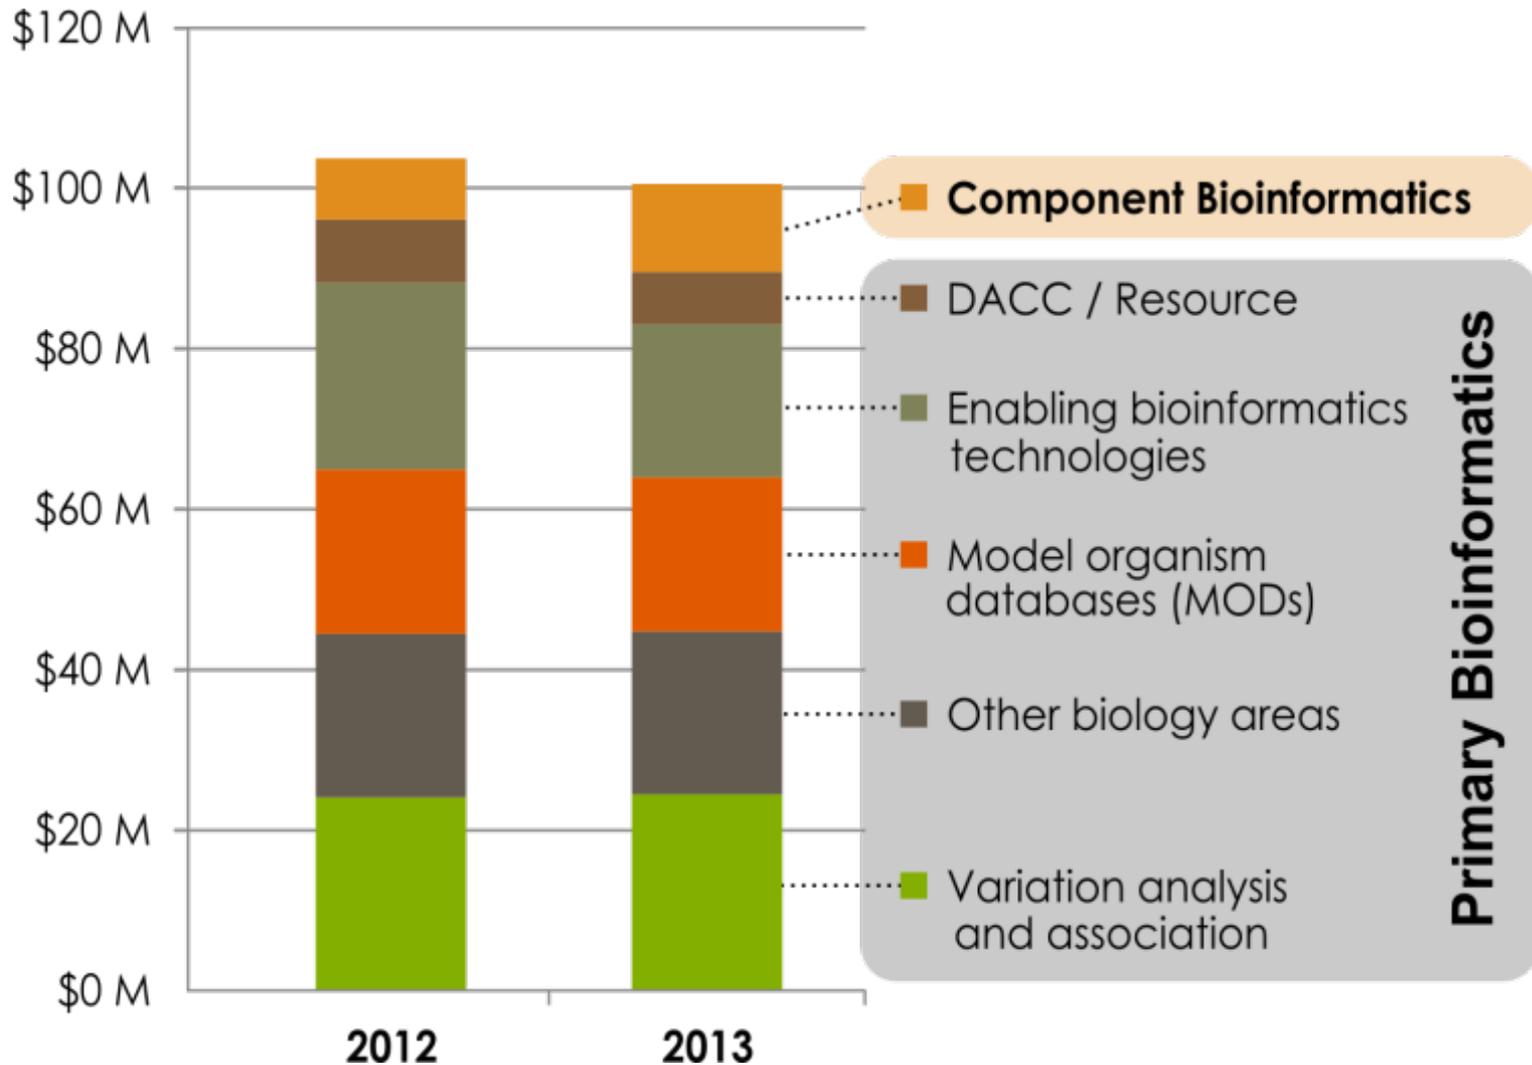

- Provide bioinformatics support services to specific projects
  - Development of data pipelines
  - Development of metadata standards
  - Storage of project data raw and derived
  - Deposition of data to NCBI or EBI
  - Provision of a web site for easy access to data, SOPs, lab protocols, tools etc.
  - Significant portion of staff time
- NHGRI provides total or partial funding

# Grant Funding totals

	2012	2013
<b>Primary Bioinformatics</b>		
Variation analysis and association	\$24.1 M	\$24.5 M
Enabling Bioinformatics Technologies	\$23.3 M	\$19.1 M
MODs	\$20.5 M	\$19.2 M
Other biology categories	\$20.4 M	\$20.3 M
DACC / Resource	\$7.9 M	\$6.5 M
<b>Subtotal for Primary Bioinformatics</b>	<b>\$96.1 M</b>	<b>\$89.6 M</b>
<b>Component Bioinformatics</b>	<b>\$7.6 M</b>	<b>\$11.0 M</b>
<b>Total</b>	<b>\$103.7 M</b>	<b>\$100.6 M</b>

# Grant Funding totals

# NHGRI Bioinformatics Program

- Bioinformatics Grants Portfolio
- **Other Bioinformatics Staff Activities**
  - Bioinformatics Consulting Services
  - *Trans NIH Bioinformatics Activities*

# Bioinformatics Consulting Services to NHGRI staff

- Technical advice on grants that include computing components
- Provide an understanding and connectivity with NCBI/EBI resources and people
- Data submission to SRA/dbGAP (NCBI)
- Centers for Mendelian Genomics (CMG)
  - data metadata structure and submission to NCBI

# NHGRI Bioinformatics Program

- Bioinformatics Grants Portfolio
- **Other Bioinformatics Staff Activities**
  - Bioinformatics Services
  - **Trans NIH Bioinformatics Activities**
    - Interactions with NCBI
    - Projects with other ICs
    - BISTI
    - NIH – NSF Big Data initiative
    - BD2K

# Trans NIH Bioinformatics Activities

- **NCBI**

- Tracking sequence data and metadata deposition from NHGRI sequencing programs
- BioProject pages for various NHGRI programs
- NCBI data/tools on the cloud (Amazon and Google)
- ClinVar /dbSNP

# Trans NIH Bioinformatics Activities

- Consortium of representatives from each of the NIH institutes and centers.
- Focuses on biomedical computing issues at NIH
- Developed broad-based FOAs for computational biology -R01, R21, R42, R43, R44

# Trans NIH Bioinformatics Activities

- **NIH – NSF Big Data Initiative 2012**

- **Joint solicitation between NIH & NSF**
  - **NCI, NIGMS, NHGRI, NIBIB, NLM, NIDA, NINDS**
  - **Core Techniques and Technologies for Advancing Big Data Science & Engineering**
- **Develop and evaluate core technologies and tools that take advantage of available collections of large data sets to accelerate progress in science, biomedical research, and engineering.**

# Trans NIH Bioinformatics Activities

## ○ BD2K

### ○ Big Data to Knowledge Initiative

- Data sharing and standards

- Software methods and systems for analysis

- Training

- Centers of Excellence for Big Data Analysis

- **Eric Green, Mark Guyer, Vivien Bonazzi, Lisa Brooks, Ajay Pillai, Heidi Sofia, Leigh Finnegan  
Chris Wellington**

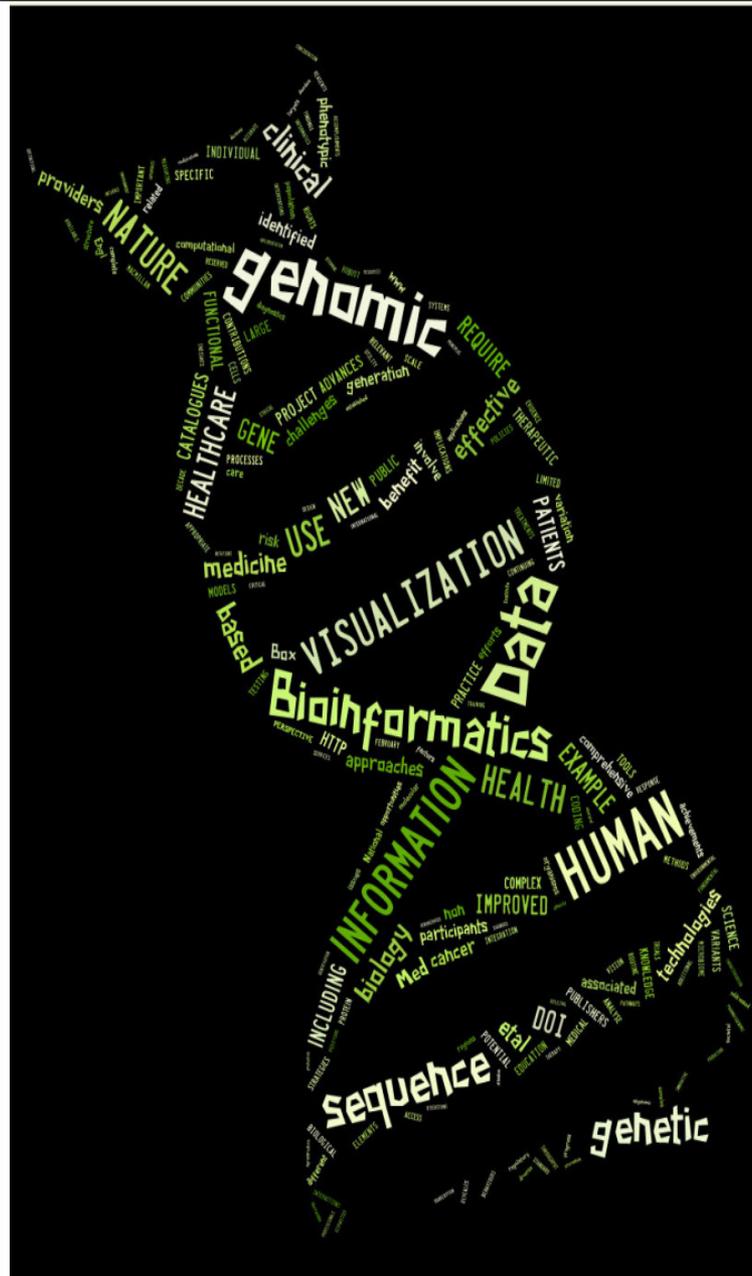

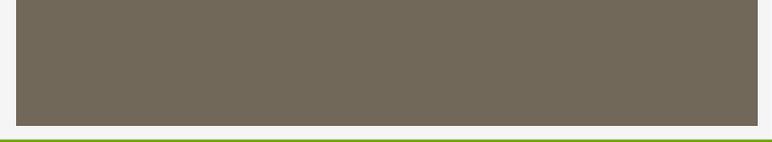

# Bioinformatics Advisory Group to NACHGR

- A small group of Council members with bioinformatics experience, and skills from development to end user
- Provides advice on bioinformatics issues that affect the NHGRI Bioinformatics program
  - Carlos Bustamante
  - Jill Mesirov
  - Bob Nussbaum
  - Lucila Ohno-Machado
