Methods
Study Selection
We sought papers published by investigators referencing datasets from The Genetic Association Information Network (GAIN). We searched through papers included in The GAIN Data Access Committee (GAIN DAC) annual reports of investigators requesting access to GAIN genotyping data.

Only publications written by study investigators acknowledging use of GAIN datasets were included in the Publications Using GAIN Genotyping Data bibliography. These publications were scanned for search terms relating to GAIN or dbGaP (ie: GAIN, dbGaP, data accession number, etc).

Publications Using GAIN Genotyping Data
