ISCC Working Group Rosters and Charges

Competencies Working Group

Korf, Bruce, Chair	American College of Medical Genetics and Genomics
Berry, Anna	Association for Molecular Pathology
Jenkins, Jean	National Human Genome Research Institute
Limson, Melvin	Association for Molecular Pathology
Marian, Ali J.	UTHealth
Murray, Mike	American College of Physicians
O'Rourke, Pearl	Partners Healthcare
Relling, Mary	St. Jude's
Rodriguez, Laura	National Human Genome Research Institute
Tooker, John	American College of Physicians
Tsongalis, Greg	American Association for Clinical Chemistry

- Charge:**
- Review surveys and other sources to see what competencies would fit into current clinical practice.
 - Review any existing competencies in genomic medicine education and existing guidelines in the use of genomics.
 - Work with individual professional societies to determine their desire for competencies and where they would fit in.

Educational Products Working Group

Jenkins, Jean, Co-Chair	National Human Genome Research Institute
Roberts, Robert, Co-Chair	American College of Cardiology
Arnett, Donna	American Heart Association
Celedon, Juan	American Thoracic Society
DeLisi, Lynn E.	International Society of Psychiatric Genetics
Johansen-Taber, Katherine	American Medical Association
Kahn, Norman, Jr.	Council of Medical Specialty Societies
Lockwood, Christina	American Association for Clinical Chemistry
Manolio, Teri	National Human Genome Research Institute
McKenna, Acacia	American Society of Clinical Oncology
Ong, Frank	Illumina
Rodriguez, Laura	National Human Genome Research Institute
Schulze, Thomas G.	International Society of Psychiatric Genetics
Shelburne, Nonniekaye	American Society of Clinical Oncology
Weitzel, Kristin	University of Florida College of Pharmacy
Wright, Louis	College of American Pathologists

- Charge:**
- Collect existing educational products from ISCC representatives.
 - Identify relevant federally-funded resources and initiatives (such as CRVR, PharmGKB, Genetic Testing Registry) that could assist genomics education efforts and clinical practice.
 - Work with use cases group to identify areas of emphasis for educational products (e.g. ordering of genetic tests, counseling, return of results).
 - Identify new advances that may require educational initiatives.

Specialty Boards Working Group

Rose, Nancy, Chair	American College of Obstetricians and Gynecologists
Blitzer, Miriam	American Board of Medical Specialties
Herzog, Meredith	American Board of Medical Specialties
Irons, Mira	American Board of Medical Specialties
Manolio, Teri	National Human Genome Research Institute
Raymond, Marilyn	American Society of Clinical Oncology
Rutter, Joni	National Institute on Drug Abuse

- Charge:**
- Determine the extent that specialty boards already have genomics in their examinations.
 - Reach out to specialty boards that may not be integrating genomics into exams at this time.
 - Link specialty boards with relevant professional societies that are already implementing genomics education or are looking to implement.

Case Studies Working Group

Williams, Marc, Chair	Geisinger Health System
Cantor, Louis B.	American Academy of Ophthalmology
D'Angelo, Alix	UTHealth
Gwinn, Katrina	National Institute of Neurological Disorders
Harris, Emily	National Institute of Dental and Craniofacial Research
Hart, Thomas	American Dental Association
Haspel, Richard	Training Residents in Genomics Working Group/Harvard
Hughes, Gordon	National Institute on Deafness and Other Communication Disorders

Jenkins, Jean	National Human Genome Research Institute
Lehner, Thomas	National Institute of Mental Health
Lum, Flora	American Academy of Ophthalmology
Ong, Frank	Illumina
Papanicolaou, George	National Heart, Lung, and Blood Institute
Pyeritz, Reed	Association of Professors of Human and Medical Genetics
Rosenow, Carsten	Illumina
Rubinstein, Wendy	National Center for Biotechnology Information
Saul, Robert	American Academy of Pediatrics
Singh, Surya	CVS
Wick, Myra	American College of Obstetricians and Gynecologists
Zorab, Richard	American Academy of Ophthalmology

- Charge:**
- Collect existing use cases and disseminate through ISCC dissemination efforts.
 - Develop general and society-specific use cases in genetics in 5 general topic areas:
 - Pharmacogenomics
 - Family History
 - Rare, single gene disorders
 - Common Disease with genetic component
 - Whole Genome/Exome sequencing
 - Incidental Findings
 - Coordinate with the Educational Products WG to identify and develop materials to support use cases.
 - Coordinate with the Competencies WG to review existing competencies and explore how to translate into use cases that support competency achievement.
 - Engage with the specialty end users to:
 - Identify subjects of interest for use case development.
 - Evaluate disseminated use cases for relevance and utility.
