

Disseminating Pharmacogenomic Education: Understanding the needs of ISCC-PEG Partner Organizations

Samantha Bailey, PharmD

ISCC-PEG Annual Meeting

Pharmacogenomics Project Group

February 16th, 2022

Precision medicine is a rapidly growing field

- Individualized care
 - Environment
 - Lifestyle
 - Genes
- Increased demand on providers
- Increased need for readily available education

There is practitioner hesitancy in utilizing precision medicine

- Unprepared
 - Lack of provider familiarity
- Uneven adoption of genomics
- Barriers
 - Limited time
 - Quantity of information
 - Where information is located

Some PGx education exists

Skaggs School of Pharmacy
and Pharmaceutical Sciences
UNIVERSITY OF COLORADO

What do ISCC-PEG partner organizations believe are gaps in pharmacogenomic education?

Project approach

Survey content

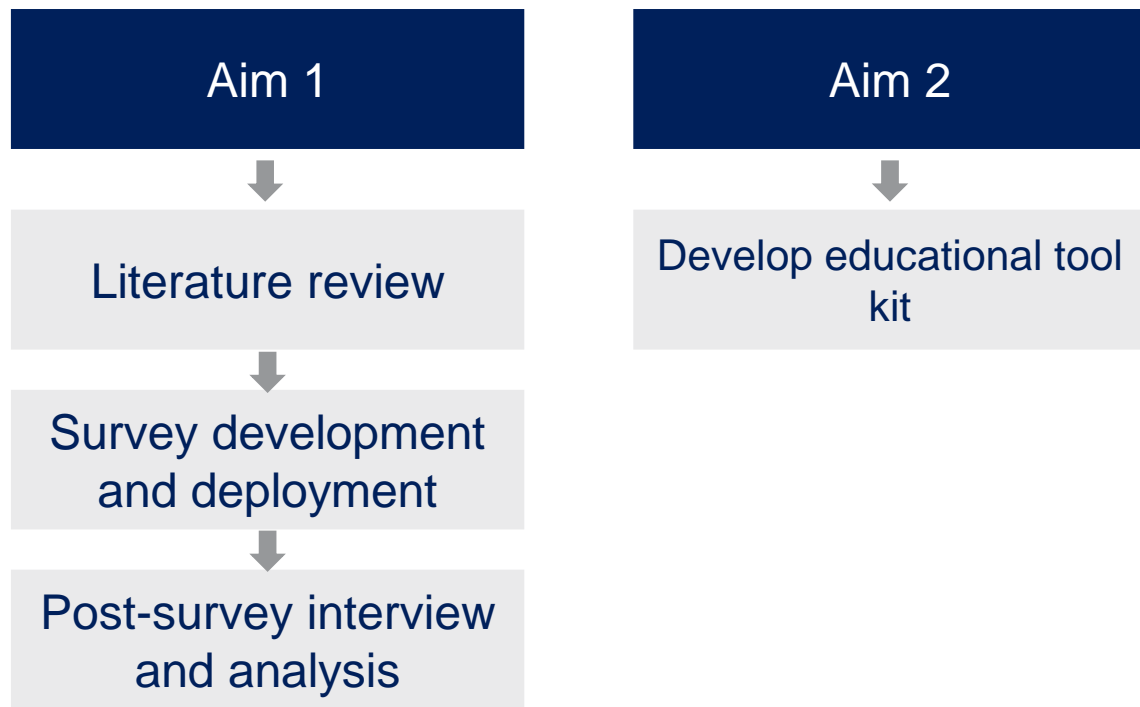

- PGx education available within an organization
- Educational needs
- Identify the drivers of PGx educational needs

Survey methods

- Awaiting IRB approval
- \leq 15 min Qualtrics survey
- Participants: ISCC-PEG partner organizations
 - Individualized emails based on ISCC-PEG Compendium
- Follow-up interviews
- 6-weeks from deployment and interviews to start of data analysis

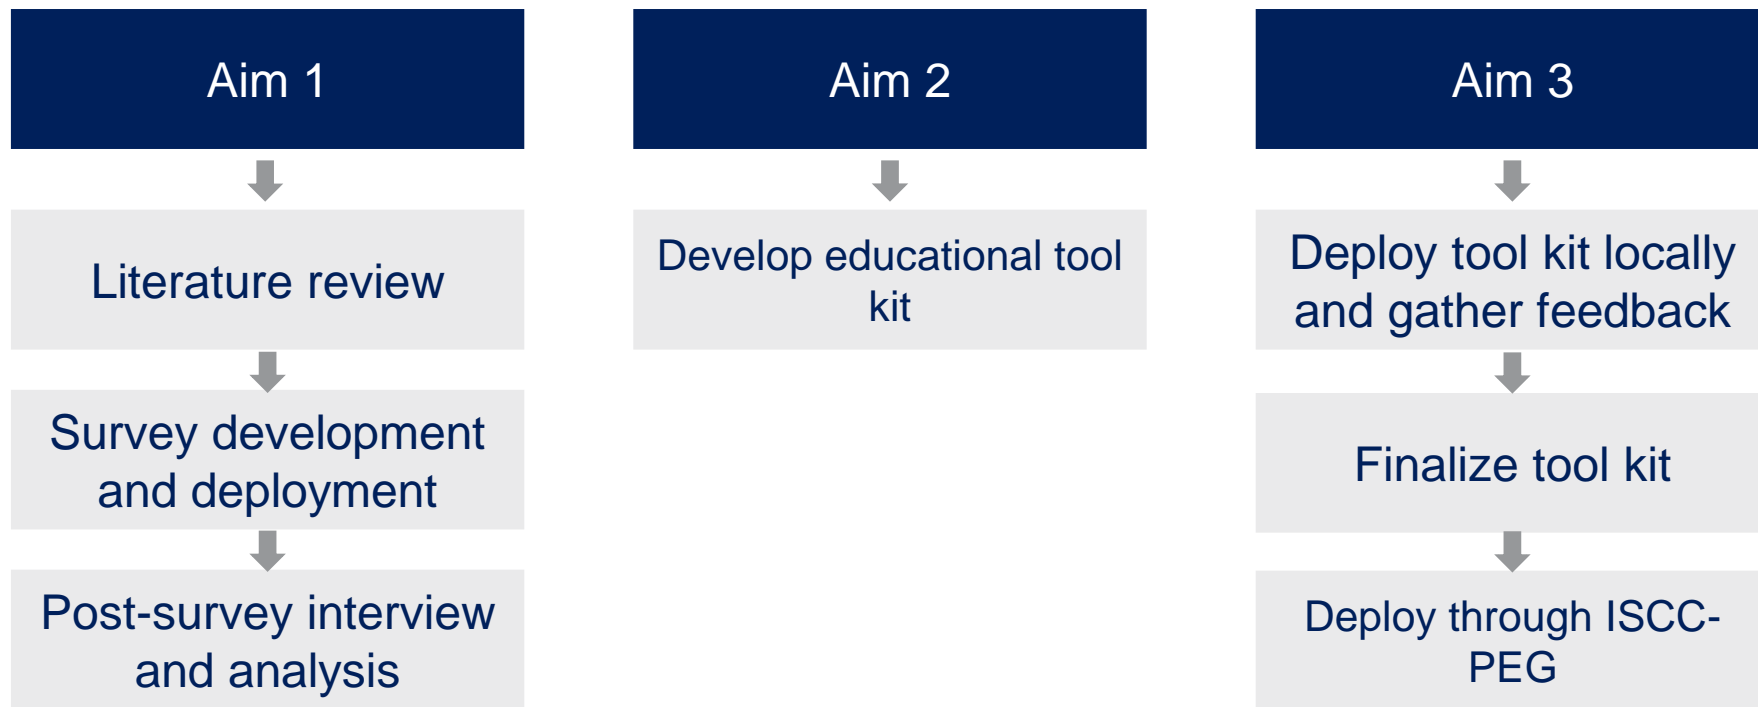

Project approach
