# Rare Disease Group

Sabrina Malone Jenkins, MD

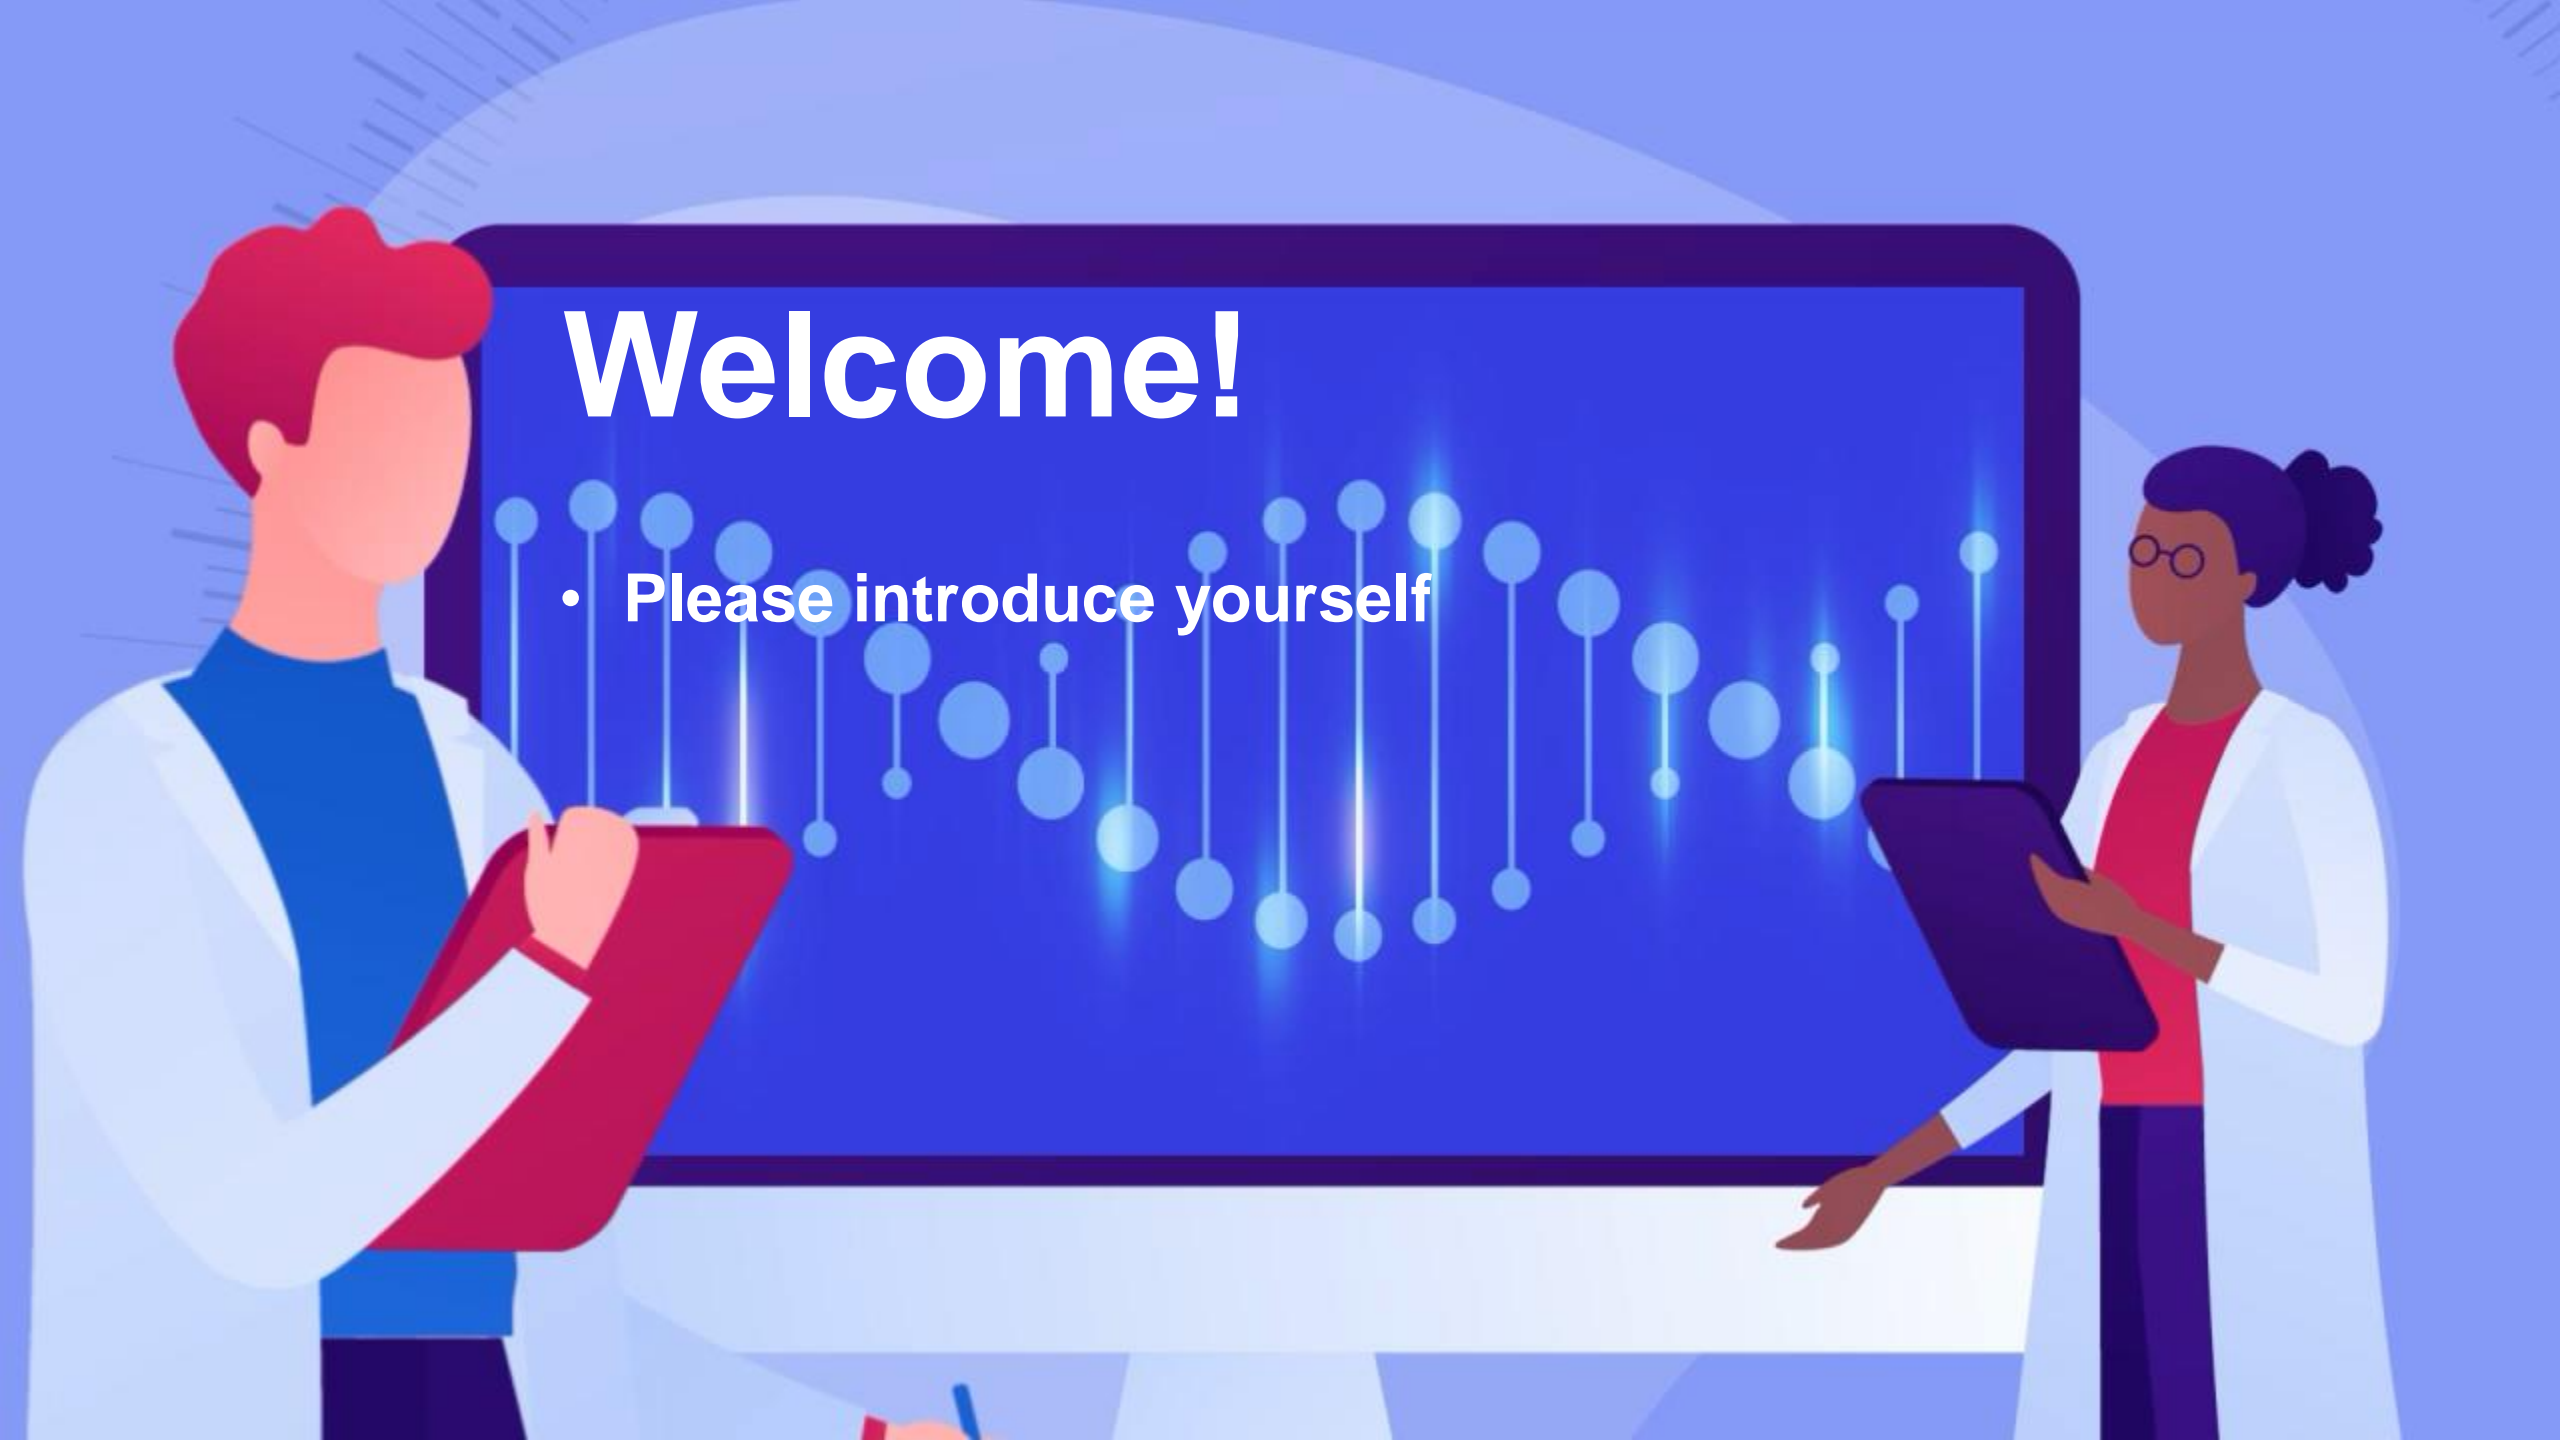

University of Utah/ Neonatology

Date

# Welcome!

- Please introduce yourself

# 2021 Accomplishments

- Training Next Generation Pediatricians in Genomics: A Case-Study Approach
  - Curriculum development
  - Pilot session at University of Utah
  - PAS workshop Fall 2021 Session
- Kelsey Ellis: ISCC-PEG Scholar Project
  - Developed genomic resource toolkit to use during workshop
  - Developed GENETEST-101 app

# 2022 is here- Let's get started

- Submitted “additional topics” workshop application for 2022 American Academy of Family Practitioner (AAFP) Annual Meeting
  - **The Undiagnosed Patient-Introduction to Genetic Testing and Rare Disease Resources**
  - September 2022

# Future Directions

- Workshop is adapted to switch out the case scenario making it more applicable to the audience
  - What platform(s) to focus on?
    - Conferences, institutions, leading versus teaching leaders, a mix..
    - Online, in person, or develop modules
  - How many per year?
  - What Specialties to focus on?
    - High Use Specialties: Neurology, Cardiology, Intensive care
    - Increasing Use Specialties: Nephrology, GI/Liver, Rheum/Immunology
    - Emerging Use Specialties: Family Practice and General Pediatrics

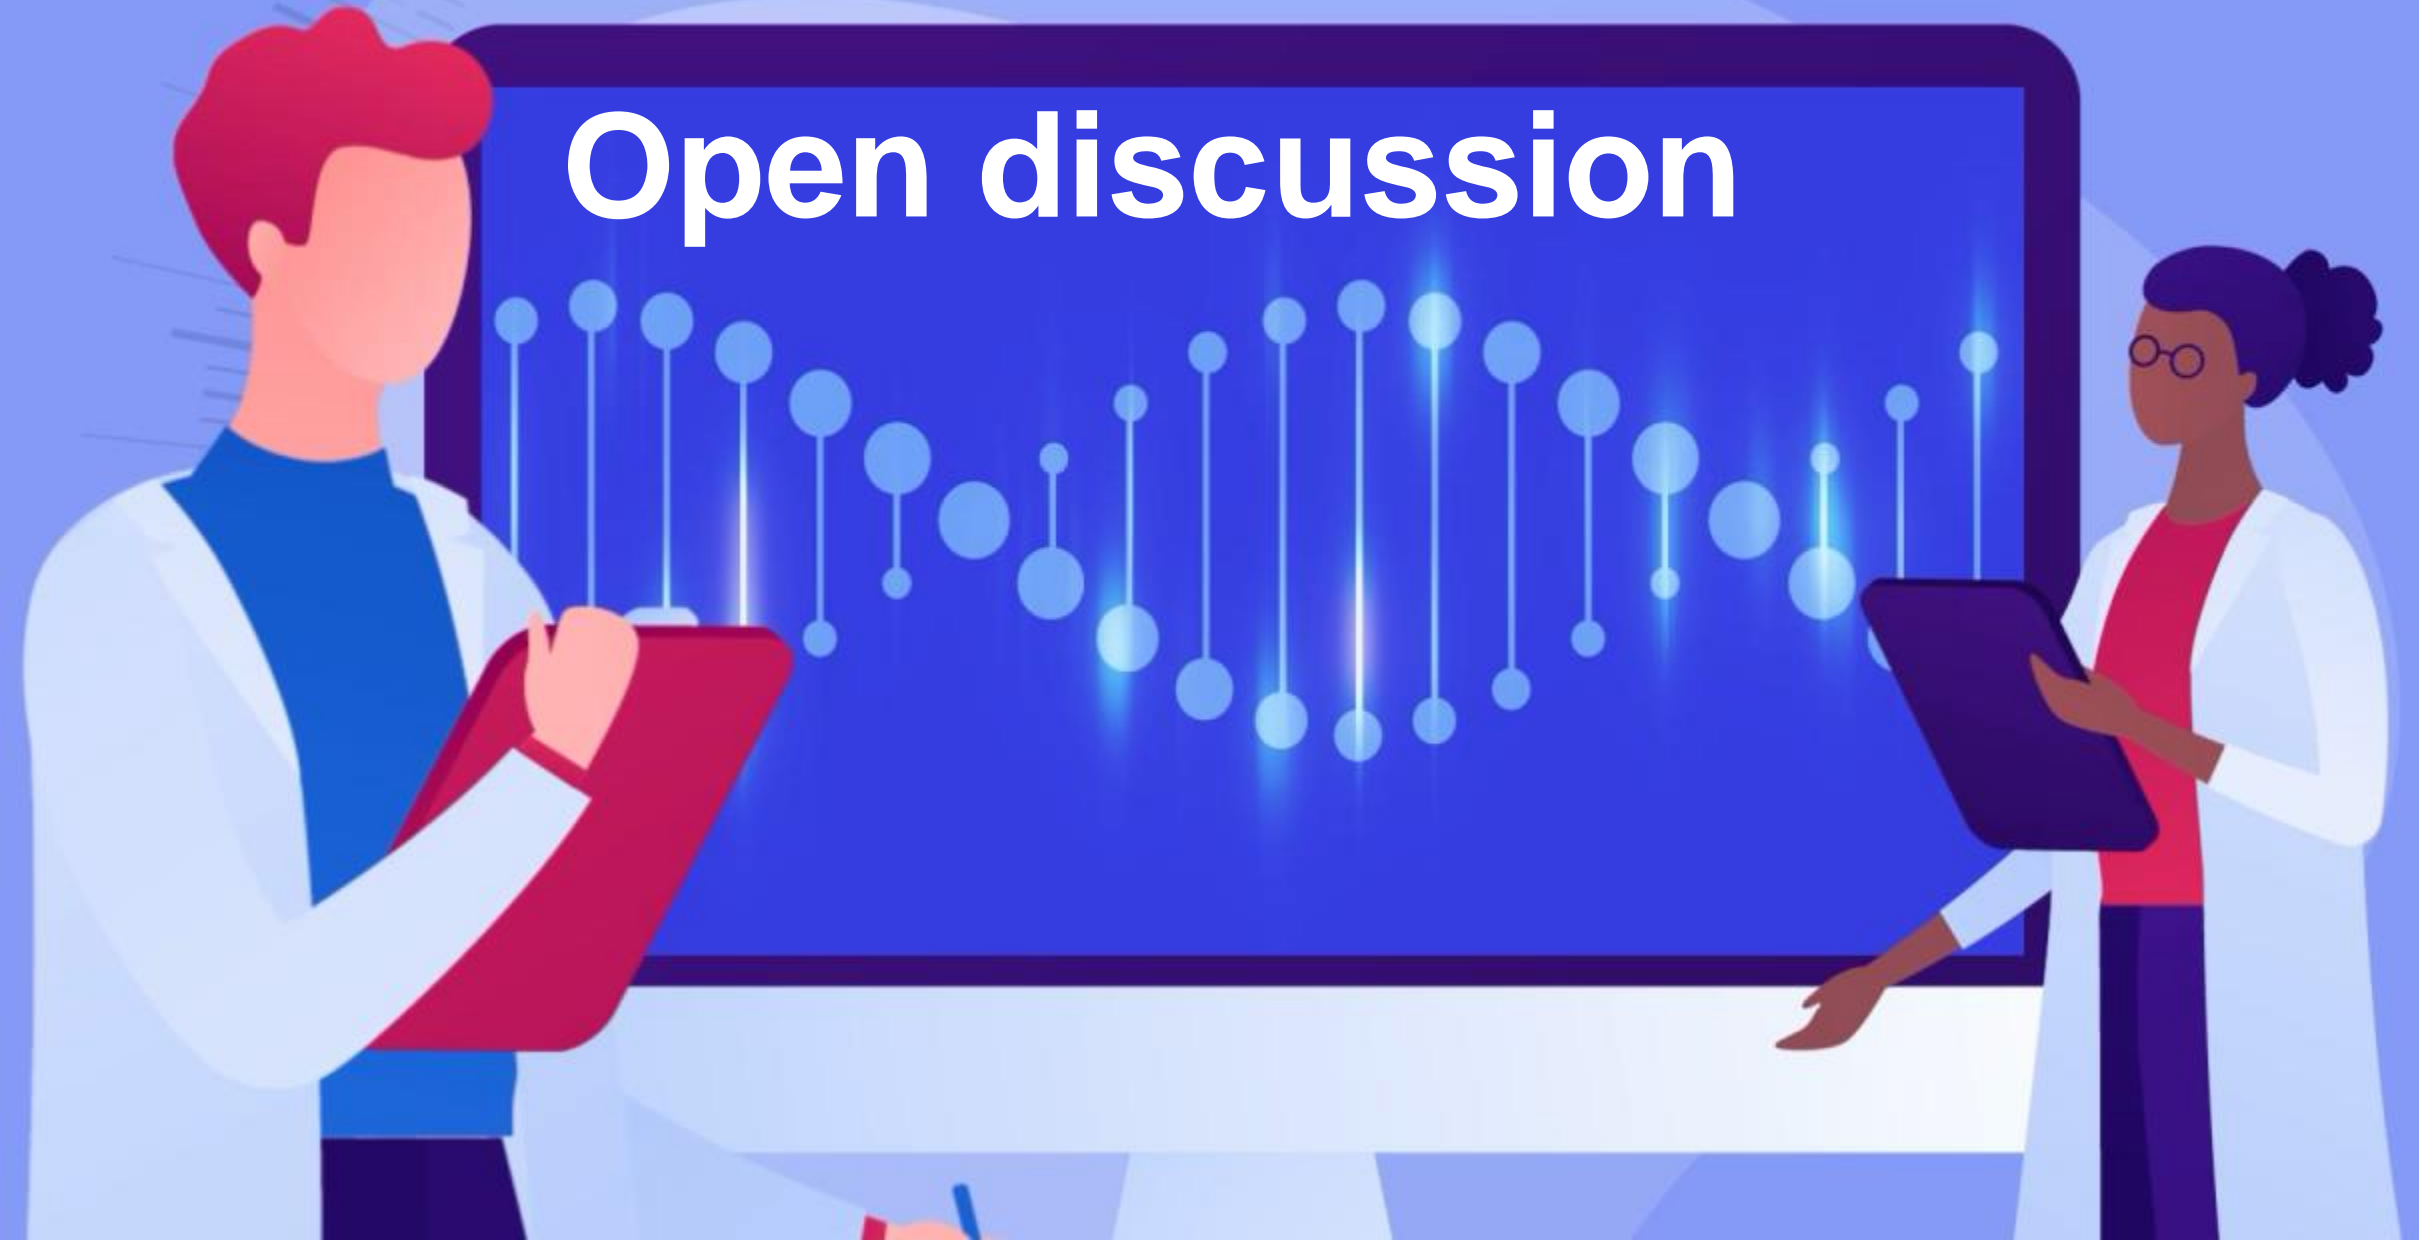

# Needs Assessment

- Send out needs assessment survey
  - Pediatric residents, fellows, NPs, NP students
  - Do they want a curriculum?
  - Pilot at particular sites
- Publish “needs assessment”

# Open discussion

# ISCC-PEG Scholar: Katharine Press Callahan

# Future Meetings

- Every other month?
- Day/Time
