

ISCC-PEG: Nursing Genomics Project Group

ISCC-PEG Annual Meeting

Wednesday, February 16, 2022

Trina Walker, DNP, APRN, FNP-C

Anne Ersig, PhD, RN

Overall Mission

This project group aims to support the integration of genetics and genomics into nursing education and practice at all levels

Key population: nursing faculty and practicing nurses (novice to advanced)

Goals

- 1. Assemble available comprehensive and accessible working resources for nursing faculty, practicing nurses, and advanced practice clinicians**
 2. Define the role of the nurse in genetics and genomics
 3. Obtain support of nursing leaders to ensure continued emphasis of genetics and genomics in routine nursing education and practice
- 

Current Activities/Initiatives

- Resource building
 - Create/update resource repository
 - G2C2 resources
 - NHGRI webpage
- Working groups
 - Updating resources
 - Identifying gaps
 - G2C2/NHGRI webpage
 - Other discipline involvement
 - “How To” Resource webinars
 - NHRGI support

Future Plans

- Update/create Blueprint for each level of nursing
 - Nursing Faculty
 - Practicing Nurses (novice to advanced)
 - Nurse Scientist
- Create strategic plans for each
 - Complete goal #2: Define the role of the nurse in genetics and genomics
 - Complete goal #3: Obtain support of nursing leaders to ensure continued emphasis of genetics and genomics in routine nursing education and practice

Let us know if you want to join!

Welcoming new members

Next Meeting: March 8, 2022 at 11am ET
