ISCC-PEG Scholars Program: A Genomics Education Opportunity

The **Inter-Society Coordinating Committee for Practitioner Education in Genomics** (ISCC-PEG) is a collaborative group aimed at improving healthcare professional genomics education. Currently, ISCC-PEG has over 250 members, which include societies, institutes, individuals and industry members. The committee is supported by the National Human Genome Research Institute (NHGRI).

The Scholars Program provides exposure to the broader genomics community and experts in the field, with the opportunity to work on a genetics/genomics-related education projects under the mentorship of an ISCC-PEG member. The appointment is for two years. Each scholar will have their travel funded for the Annual ISCC-PEG Meeting (typically January or February) for a presentation on their project progress. This program is not a full-time fellowship, post-doctoral, or salaried position. Travel to the Annual ISCC-PEG Meeting is the only financial component.

Requirements

- Enrollment in a college, a higher degree program or a training program when the student or trainee begins their term as a scholar.
- Show interest in genetics and healthcare professional education. However, expertise or training program focus is not required.
- Be able to commit to the full two-year term.
- Be willing to work on a genetics education project with an assigned mentor.
- Participate in monthly conference calls and attend/present at the Annual ISCC-PEG Meeting.
- Submit a letter of support from the supervisor or program director.
- Eligible to work in the United States. NHGRI will not sponsor visas or international travel.

To apply, visit genome.gov/iscc and fill out the online application. You can browse the website to learn more about ISCC-PEG and its goals and missions. Applications are due on November 1, 2022. Selected candidates will be notified by mid-December, 2022.
