

UTRGV Diversity Center for Genome Research Lunch and Learn

ENVIRONMENTAL CHEMISTRY AND TOXICITY OF HEAVY METALS:

A PERSPECTIVE FROM PLANT-METAL INTERACTIONS

June 28, 2024

Noon – 1:00pm

Dr. Jason Parsons
School of Earth, Environmental
and Marine Sciences

Dr. Jason Parsons is a Professor in UTRGV's School of Earth, Environmental, and Marine Sciences. His laboratory pursues a broad range of research projects within environmental chemistry, nanotechnology, and materials chemistry. He currently is a co-investigator for the *UTRGV Diversity Center for Genome Research* grant award from the National Human Genome Research Institute. In this role, he is conducting research in exposomics, assessing the role of exposure to persistent organic pollutants and heavy metals in disease risk in Mexican Americans. During the *Lunch and Learn* session, Dr. Parsons will discuss his work on environmental chemistry and toxicity of heavy metals.
